

Chris Mudrick

Site Vice President

Limerick Generating Station, Exelon Nuclear

Profile

Mr. Mudrick is responsible for the overall operation of the Limerick site, including: Operations, Maintenance, Work Management, Engineering, Training, Chemistry/Environmental, Regulatory Assurance and Radiation Protection. He provides leadership and direction to ensure the safe and economical operation of the plant, including security.

Limerick is known for its safe, reliable, low-cost operations and prides itself on being a good neighbor in the local community.

Limerick has produced over 20 million net megawatt hours of electricity in each of the past three years. With both units running at 100% power, Limerick produces enough electricity to power over two million average American homes.

Professional History

Mr. Mudrick has more than 21 years of experience in the nuclear industry. Prior to becoming Limerick's Vice President, he was the Limerick Plant Manager. In that role, he oversaw the day-to-day operations and maintenance at the plant. His previous positions include the Director of Operations, and the Director of Engineering at Limerick. Prior to that, he served in various management positions at Limerick and Peach Bottom, and was a key member of the Millstone Recovery Team.

Education & Professional Affiliations

Mr. Mudrick holds a Bachelor of Science degree in Electrical Engineering from Lehigh University in Bethlehem, Pennsylvania.

He was licensed by the NRC as a Senior Reactor Operator at Limerick.

He has completed several leadership programs throughout his career, and is a licensed professional engineer in the state of Pennsylvania.

He is an active member of the American Nuclear Society, and serves on the board of Creative Health Services and the Tri-County Area Chamber of Commerce.

Family

Mr. Mudrick lives in West Chester, Pa. with his wife Jeanne and their four children.
