

ExTex LaPorte Generating Station

Plant Statistics

Location:

Houston, Texas

Capacity:

160 MW

Configuration:

4 units; natural gas peaking

Milestone

This facility in LaPorte, Texas, near Houston, was Exelon's first wholly-owned plant in the state.

History

The four combustion turbines on the site, part of Exelon's peaking fleet, are maintained by Airco Industries and operated remotely by Exelon Power from Kennett Square, Pennsylvania.
