

# Fairless Hills Generating Station

## Plant Statistics

### Location:

---

Fairless Hills, Pennsylvania

### Capacity:

---

60 MW

### Configuration:

---

2 units; landfill gas

## Milestone

In 1997, PECO Energy, an Exelon company, received the Pennsylvania Governor's Award for Environmental Excellence for the development of the methane gas generation facility at Fairless Hills.

## History

Units are located inside the USX Fairless Works, supplying steam to the steel-making facility and generating electricity to the transmission system.
