

## *Exelon Wind*

Exelon Wind, a division of Exelon Power, owns and operates 38 wind projects located in nine states. Exelon Power is a business unit of Exelon Generation Company, LLC. Exelon Wind's projects are capable of producing 895 megawatts (MW) of clean electricity. Exelon Wind is headquartered in West Des Moines, Iowa.

Wind and other clean energy sources are important elements of Exelon's strategy to offer more low-carbon electricity in the marketplace as part of *Exelon 2020: A Low-Carbon Roadmap*. The goal of *Exelon 2020* is to eliminate the equivalent of the company's 2001 carbon footprint, or 15 million metric tons of greenhouse gas emissions, by 2020.

The 38 wind projects Exelon Wind operates are located in nine states:

- **Idaho** - Exelon Wind operates three wind projects in Idaho, which are capable of producing a total of 88.2 MW of electricity.
- **Illinois** - Exelon Wind operates AgriWind Project, an 8.4 MW wind project located in Tiskilwa, Illinois.
- **Kansas** - Exelon Wind operates Greensburg Wind Project, a 12.5 MW wind project, located southwest of Greensburg in Kiowa County, Kansas. The company is also developing Shooting Star Wind Project, a 104 MW wind project in Kiowa County, Kansas.
- **Maryland** - Exelon Wind operates Criterion Wind Project, a 70 MW wind project located in Garrett County, Maryland.
- **Michigan** - Exelon Wind operates three wind projects in Michigan, capable of producing a total of 212 MW of clean electricity. Michigan Wind 2 entered commercial operation in January 2012 and is the first wind project constructed by Exelon. The company is currently pursuing two additional wind development projects in Michigan.
- **Minnesota** - Exelon Wind operates nine wind projects in Minnesota, which are capable of producing a total of 77.7 MW of clean electricity.
- **Missouri** - Exelon Wind operates four wind projects in Missouri, which are capable of producing a total of 162.5 MW of clean electricity.
- **Oregon** - Exelon Wind operates four wind projects in Oregon, which are capable of producing a total of 74.5 MW of clean electricity.
- **Texas** - Exelon Wind operates 12 wind projects in Texas, which are capable of producing a total of 189.8 MW of clean electricity.
